

Circle Solutions

We develop software solutions that connect people, processes, and data.

Our technologies help businesses work faster, make more confident decisions, and achieve more — without unnecessary complexity.

Areas of expertise:

- **Custom software development**
- **Integrated enterprise systems**
- **Cloud and mobile solutions**
- **Business process analytics and digitalization**

Our approach is simple:

We don't just create software — we build tools that make your workday easier.

We make software simple.

Circle Solutions develops custom software that helps businesses work more efficiently. We do this without the fuss — no unnecessary features, no complicated systems. Only what's needed. Or, as we like to say: just connect the dots.

Our core elements are:

- Trustworthy
- Calm
- Clarity
- Simplicity
- Functionality

Circle D.O.T.S.

An integrated software platform that helps companies manage communications, collaboration, and analytics in one place.

Main modules:

Intranet — a unified space for updates and announcements.

Dashboards — data visualization for quick decisions.

Documents — secure storage and collaboration on files.

Circle D.O.T.S. — transparency, control, and confidence in every process.

Circle D.O.T.S.

An integrated software platform that helps companies manage communications, collaboration, and analytics in one place.

- Custom software solutions — tailored to your business needs.
- Cloud solutions — secure and scalable.
- Cybersecurity — audit, testing, and protection.
- Mobile applications — for iOS, Android, and other platforms.
- Web development — modern websites and applications.
- Support and maintenance — regular updates and improvements.

We develop software that works the way you need it to.
